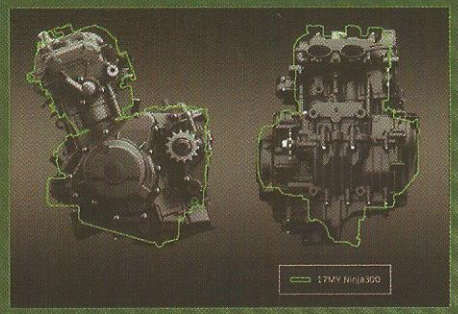
Fitur



Mesin Ninja 250 baru menghantarkan keseimbangan akan performa dan kemudahan kontrol. Bertenaga 39PS terbesar dikelasnya, mesin didesain ulang untuk mengoptimalkan ukuran, berat dan efisiensi.

Ukuran clutch lebih ringkas (ø139mm>>ø125mm) menjadikan kopling lebih ringan 20%. Mencegah roda belakang melompat/skid pada saat penurunan gear secara tiba-tiba.

Kipas radiator dengan penutup baru, mengalirkan panas mesin menjauh dari pengendara, berkontribusi pada kenyamanan berkendara.

Ninja 250 baru menggunakan rangka trellis dengan desain serupa dengan Ninja H2. Desain rangka baru ini berkontribusi pada ringannya bobot Ninja 250.
